

**Zadatak 31.** Paraboli  $y^2 = 2px$  upisan je jednakostraničan trokut površine  $P = 3\sqrt{3}$  kojem je jedan vrh u tjemenu parabole. Kako glasi jednačba parabole?

*Rješenje.*

$$P \dots y^2 = 2px$$

$$A(0, 0)$$

$$B, C \in P \implies B(x_0, \sqrt{2px_0}), C(x_0, -\sqrt{2px_0})$$

$$P = 3\sqrt{3}$$

$$\frac{a^2\sqrt{3}}{4} = 3\sqrt{3}$$

$$a^2 = 12 \implies a = 2\sqrt{3}$$

$$x_0 = v_{\Delta}$$

$$x_0 = \frac{a\sqrt{3}}{2} \text{ (jednakostraničan trokut)}$$

$$x_0 = 3$$

$$a = d(B, C)$$

$$a = \sqrt{(x_0 - x_0)^2 + (\sqrt{2px_0} + \sqrt{2px_0})^2}$$

$$2\sqrt{3} = \sqrt{(2\sqrt{2px_0})^2}$$

$$2\sqrt{3} = 2\sqrt{2p \cdot 3}$$

$$\sqrt{3} = \sqrt{6p} \quad /^2$$

$$3 = 6p \implies p = \frac{1}{2}$$

$$H \dots y^2 = 2px$$

$$y^2 = x$$
