

**Zadatak 11.** Duljine osnovica trapeza jednake su 12.5 cm i 4 cm, a dva su šiljasta kuta jednaka  $72^\circ$  i  $58^\circ$ . Izračunaj površinu tog trapeza.

**Rješenje.** Povucimo paralelu  $DE$  s krakom  $\overline{BC}$ . Tako dobijemo trokut  $\triangle AED$ . Imamo:

$$a = 12.5 \text{ cm}$$

$$c = 4 \text{ cm}$$

$$\alpha = 72^\circ$$

$$\beta = 58^\circ$$

$$P = ?$$

$$P_{\triangle AED} = P_{\triangle AED}$$

$$\frac{8.5^2 \cdot \sin 72^\circ \cdot \sin 58^\circ}{2 \sin 50^\circ} = \frac{8.5 \cdot v}{2} \implies$$

$$v = \frac{2 \cdot (8.5^2 \cdot \sin 72^\circ \cdot \sin 58^\circ)}{8.5 \cdot 2 \sin 50^\circ} = 8.95 \text{ cm}$$

$$P = \frac{a + c}{2} \cdot v = \frac{12.5 + 4}{2} \cdot 8.95 = 73.83 \text{ cm}^2.$$
